Domain	

# **Audit Updates**

Initial Audit	9th February 2022
Corrected	

# **Contract Analysis**

CriticalMediumMinorPass

Severity	Code	Description
•	ST	Contract Owner is not able to stop or pause transactions
•	OCTD	Contract Owner is not able to transfer tokens from specific address
•	OTUT	Owner Transfer User's Tokens
•	ELFM	Contract Owner is not able to increase fees more than a reasonable percent (25%)
•	ULTW	Contract Owner is not able to increase the amount of liquidity taken by dev wallet more than a reasonable percent
•	MT	Contract Owner is not able to mint new tokens
•	ВТ	Contract Owner is not able to burn tokens from specific wallet
•	ВС	Contract Owner is not able to blacklist wallets from selling

# **Contract Diagnostics**

CriticalMediumMinor

Severity	Code	Description
•	L01	Public Function could be Declared External
•	L04	Conformance to Solidity Naming Conventions
•	L09	Dead Code Elimination
•	L12	Using Variables before Declaration
•	L15	Local Scope Variable Shadowing
•	L14	Uninitialized Variables in Local Scope

#### L01 - Public Function could be Declared External

Criticality	minor
Location	contract.sol#L86,94,282,290,307,333 and 12 more

#### Description

Public functions that are never called by the contract should be declared external to save gas.

withdrawnDividendOf dividendOf withdrawDividend

#### Recommendation

Use the external attribute for functions never called from the contract

# L04 - Conformance to Solidity Naming Conventions

Criticality	minor
Location	contract.sol#L848,849,866,891,1273,1280 and 8 more

#### Description

Solidity defines a naming convention that should be followed. Rule exceptions:

- Allow constant variable name/symbol/decimals to be lowercase.
- Allow \_ at the beginning of the mixed\_case match for private variables and unused parameters.

```
_routerAddress
_prevOwner
_tokenSupply
...
```

#### Recommendation

Follow the Solidity naming convention. https://docs.soliditylang.org/en/v0.4.25/style-guide.html#naming-conventions

#### L09 - Dead Code Elimination

Criticality	minor
Location	contract.sol#L29,1306,769,729,795,746 and 5 more

#### Description

Functions that are not used in the contract, and make the code's size bigger.

trySub
tryMul
tryMod
...

#### Recommendation

Remove unused functions.

### L12 - Using Variables before Declaration

Criticality	minor
Location	contract.sol#L1788,1787,1789

#### Description

The contract is using a variable before the declaration. This is usually happening either if it has not been declared yet or the variable has been declared in a different scope.

lastProcessedIndex
iterations
claims

#### Recommendation

The variables should be declared before any usage of them.

# L15 - Local Scope Variable Shadowing

Criticality	minor
Location	contract.sol#L1208,1446

#### Description

The are variables that are defined in the local scope containing the same name from an upper scope.

```
totalSupply
_symbol
_name
```

#### Recommendation

The local variables should have different names from the upper scoped variables.

# L14 - Uninitialized Variables in Local Scope

Criticality	minor
Location	contract.sol#L1787,1788,1789

#### Description

The are variables that are defined in the local scope and are not initialized.

lastProcessedIndex
claims
iterations

#### Recommendation

All the local scoped variables should be initialized.
